

NEED MASONRY WORK OR PAINTING? CALL ADVANTAGE HANDYMAN

Thousands of satisfied customers in Central Virginia are well aware that Advantage Handyman Services provides skilled craftsmen for many household projects. The Handyman Division concentrates on small jobs while the Remodeling Division tackles larger projects such as screen porches, basement finishing, bathroom remodels and additions. But lots of homeowners are unaware of two other important divisions within the locally owned company – masonry and painting.

“Our staff in the Masonry Division has over 25 years experience,” stated Sean Castorina, owner of Advantage Handyman Services. “We specialize in retaining walls, sidewalks and steps, patios and stamped concrete projects.

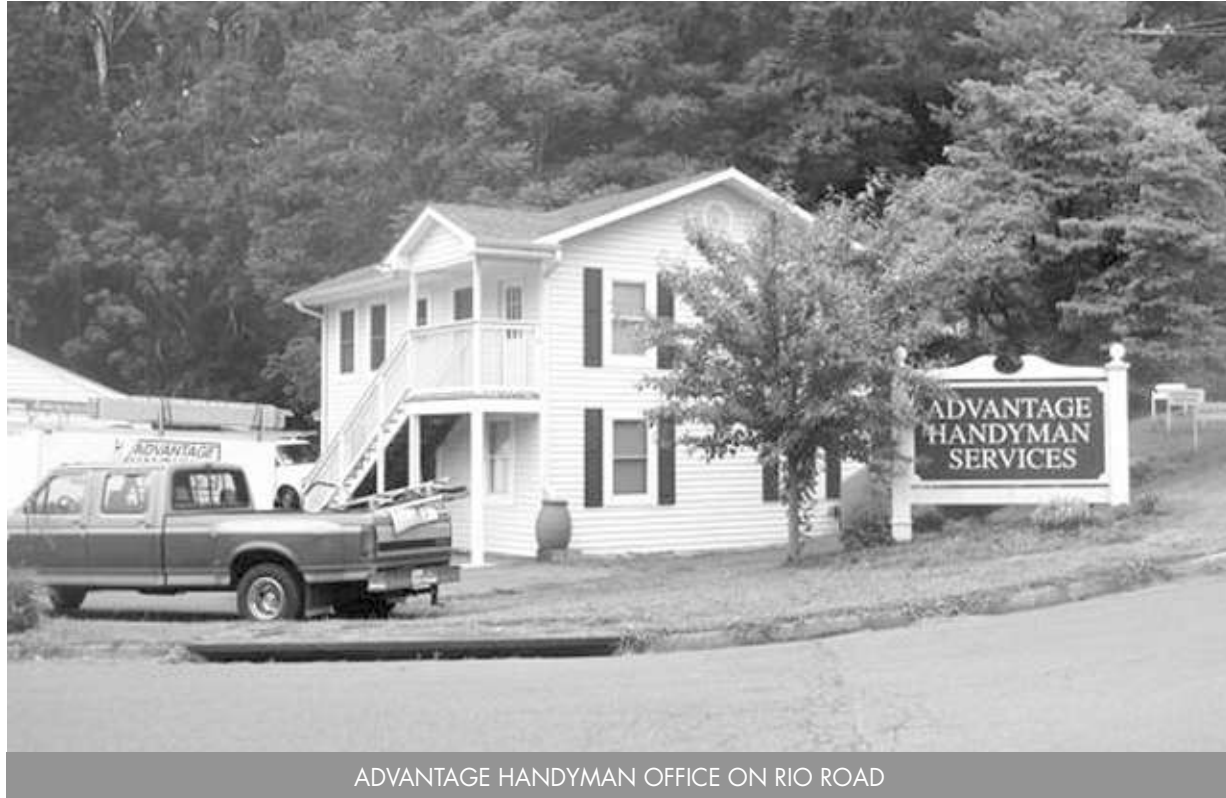

We do both repair and building with masonry, which one of the numerous and relatively inexpensive ways to approve the appearance of your home and add value.”

Advantage Handyman also maintains an outstanding painting staff and is a name homeowners have come to trust. “In painting, it’s all about prep work,” Sean emphasized. “But unless you are out there on the ladder with the painters, you really don’t know what kind of work they are doing.”

Cheap estimates, Sean noted, almost always indicate a minimal amount of time spent in prepping the house for painting. And that kind of work never lasts.

“It has never been our goal or desire to offer the lowest prices on painting,” he said. “You simply cannot promise quality materials, highly skilled labor and offer a warranty if you are the cheapest company in town.”

“I would be suspicious about cheap estimates,” Sean added. “Those companies rarely spend the time necessary in sanding, caulking and

priming. Many times, we are called in to re-do some of these inexpensive paint jobs.”

Having to re-scrape and redo a poor painting job adds even more expense. Advantage Handyman has had a Painting Division for nearly a decade. They do interior and exterior work, custom colors and metal roofs.

“We always caulk, we always sand and we always use primer on new and exposed areas,” Sean stated “We also use the very finest paints on the market.”

Recently, Sean’s veteran painters have been applying Sherman Williams Duration paint, which has a lifetime warranty on peeling and blistering, as long as you own your home.

“This is excellent paint and requires only one coat,” Sean said. “It can be done with a little

less labor costs, and has a fantastic warranty.”

In addition to the warranty provided by Sherman Williams and other top paint manufacturers, Advantage Handyman backs its work with a three-year warranty on painting.

“Our mission is to provide workmanship that exceeds our customers’ expectations in a timely and professional manner,” Sean emphasized.

Sean Castorina has a Virginia Class A Contractors License, Master in Construction Management and the firm belongs to the Better Business Bureau.
